## Adelaide and after

Adelaide, Championship and Congress, seem now already in a long way away the Championship and Congress were easy and smooth events while we were living them and yet I believe they both were important landmarks in the development of Archery.

The Championship was the first real International large scale test of the Grand FITA Round. I obviously was convinced of its qualities but it is always wise to reserve judgement of a novelty until it is properly tested.

Now we know: not only it works, it is easy to organize, to shoot and to judge and it achieves its aim of making Archery competitions more exciting and clearer to follow; it has proved it is no lottery, it is not won by luck.

To win in it you must have all the skill, concentration and determination that the Double FITA Round requires but you must have as well the courage and the control of your nerves that are needed to face the constant threat of elimination.

Both Champions totalled over 1300 in both the Open and the Final Rounds: no luck in that! In return all those remaining in the race could hope to win right until the last arrows: no more resignation facing unbridgeable gaps for the last two days of shooting.

But the real winner I think is the Teams Event. To most participants it was the first experience of it: for me it certainly was the first exposure.

I knew it was right to try and give Archers the feeling of real team work, not just the abstract

## Members of the FITA Council

*President:* Francesco Gneccchi-Ruscone (ITA, 1985-1989)

*First Vice-President:* Donald M. Lovo (CAN, 1987-1991)

*Vice-Presidents:*  
François de Massary (FRA, 1987-1989),  
Stan Patterson (GBR, 1985-1989),  
Nikola Skoric (YUG, 1987-1991)

*Members:* Knud Hammer Andrerøn (DEN, 1985-1989),

James Easton (USA, 1987-1991),

Peter Kliegl (FRG, 1985-1989),

Steve Lieberman (USA, 1987-1991),

Ramon Lim (PHI, 1987-1991),

Don Stamp (GBR, 1987-1991),

Raoul Theeuwes (BEL, 1987-1991)

*Secretary General:*  
Giuseppe Cinnirella (ITA, 1985-1989)

*Treasurer:* Giovanni Mangino (ITA, 1985-1989)

On the platform, during the opening of the XXXVIIth Congress of the FITA, from left to right, Georges Helwig (USA), first Vice-President of the FITA from 1983-1987, Richard Kevan Gosper, member of the International Olympic Committee for Australia and representing the IOC President, SE Juan Antonio Samaranch. Francesco Gneccchi-Ruscone and Giuseppe Cinnirella, President and Secretary General of the FITA.

Mrs Gneccchi-Ruscone and the President of the FITA (on the left) congratulating Mrs. Lieva Reilly and Norma Smith, respectively President and Secretary General of the Organizing Committee of the XXXIVth World Championships of Outdoor Target Archery with Mr. John Womersly, President of the Australian Federation of Archery, looking on and smiling.

knowledge of a sum of individual scores. I had not anticipated however how quickly, automatically and deeply teams would find themselves, Archers would adjust their shooting to that of their team makes, learn to read the score by nine arrows, walk to the targets and back together.

The Teams Finals that will now crown all our major events will contribute to the image and therefore to the development of our Sport in a positive and lasting manner.

Not all must be self-congratulation however.

Some consequences must be drawn from this experience, particularly in the communication of results.

The Adelaide organisers had very cleverly devised to show the current dividing score, below which you faced elimination. This was certainly precious information for the competitors but could not help the spectators who do not know the current standing of every Archer. We shall have to work on that and improve this type of communication in view of our future commitments.

Congress also was important.

The acceptance of the Standard Bow and the Standard Round open to Archery new great possibilities of expansion.

Bows of good performance, of sufficiently simple technology and sufficiently low cost will encourage countries that are now severely handicapped by lack of foreign currency to destine to the acquisition of Sports equipment. We know only too well that not only among countries that we hope will join FITA but also for many Member Associations of long standing this can be a very serious problem.

For all Member Associations however the Standard Bow represents new possibilities of expansion.

The promotion of Archery among the young, in schools, in leisure and recreation organisations and clubs can only be based on events in which all can compete with equivalent, easily accessible, inexpensive equipment.

The second stage, that of a FITA designed and patented Standard Bow is already under way: prototypes will be available soon; the Development and Technical Assistance Committee is studying how courses and seminars on equipment making can be organized so that more and more countries or economic areas can become self sufficient in the production of what they need.

Each Member Association can receive from FITA the rights of manufacturing under licence for a purely symbolic royalty; it can in turn negotiate in its country with manufacturers in order to obtain the conditions most propitious in the local circumstances for the development of Archery.

It is essential to believe in it – and to help promote it – if you believe that the expansion of Archery can be induced and accelerated by a conscious, deliberate and suitably directed effort. Which do you believe?

Opening Ceremony of the XXXIVth World Championships: the arrival of HE the Governor General of Australia, Sir Ninian Steven and Lady Steven, escorted by the mounted police of the Southern State of Australia.

# AFTER ADELAIDE

**Thanks to the Grand FITA Round, archery makes a name for itself among the most captivating of sports shows.**

The XXXIVth World Championships organized from 23rd to 29th March 1987 in Adelaide (AUS), will mark an essential milestone in the history of archery. The introduction of new competition rules, the Grand FITA Round, served as proof that our sport will from now on appear amongst the most spectacular sports disciplines. The interest in the events is maintained from start to finish, it even mounts, crescendo, up until the last round. Moments full of emotion and suspense are multiplied ad infinitum. The team competitions in particular, gave rise to excitement. For the first time, they took place without being tied to the individual events. Without exaggerating, everyone was excited, a new road was opened and the popularity of sports archery is now certain.

## Opening: 23rd March

Under the sun, with ideal weather conditions, the 160 archers (men and women) from 32 national associations participated in the opening ceremonies, honoured by the presence of H.E. the Right Honourable Sir Ninian Steven, Governor-General of Australia, welcomed by Francesco Gneccchi-Rusccone, President of FITA.

## The individual events: 24th to 27th March

The following day and the day after all the competitors competed in the open qualifying round. The 24 best men and 24 best women found themselves qualified to compete in the eighth finals. From then on, starting with the first arrow shot at 30 m in 1/8th finals until the last arrows shot at 90 m in the finals. The pressure and

*Among the winners figuring from left to right, in the front, the members of the men's team from FRG (1st), the Chinese Yao Yawen (3rd), the members of the women's team from USSR (1st), the French (3rd), the Americans (2nd); on the podium are the Koreans (2nd), the individual winners (on the highest step) and the Chinese (3rd).*

excitement did not cease to mount. Everyone could feel it, the competitors of course, but also every spectator, official and journalist.

In the 1/8 finals, with 24 archers on each line, following the evolution of the competitions became easier. Following them became even better in the 1/4 finals with 18 competitors on each line and in 1/2 finals with 12 participants. No position could be taken for granted, and the surprises were visible for all. Each round of arrows brought about joys and deceptions as well as numerous commentaries on the permanent modifications in the rankings. The eight last hopefuls for victory met in the finals. The show's attractive force grew and grew.

In the women's event, for the first time in the history of the championships, a Chinese, Xiagjun Ma, won. She was consistent since she was 6th in the open event, 7th in the 1/8 finals, then 4th in both the 1/4 finals and the 1/2 finals. Let us take note of the runner-up, Hee-Kyung Wang (KOR), who played a remarkable championship, being first in the four qualifying events preceding the finals. In the men's event, the Soviet Vladimir Escheev dominated with a certain "panache". He was ranked 1st in the open qualifying event, in the 1/4 finals and the 1/2 finals for each qualifying event, with the exception of the 1/8 finals where he was in 9th place.

The competition was fierce. The results shown opposite prove just this. Jump offs were even necessary to reserve several places for the events.

Sometimes one would have to wait until the last arrow was shot in order for the winner to be decided. This was the case in the last round of the last day at 90m, as at one point, five archers were grouped to compete for second place.

The scores shot by two world champions during the event as whole prove their ability to adapt to the concept of the Grand FITA Round, but also to confront weather conditions, which were excellent on the first day despite the heat, but which were more disquieting during the last two days due to wind gusts. Here are their scores:

Ma - Eliminating: 1306

Finals: 1302 Total 2608  
 Esheev - Eliminating: 1300  
 Finals: 1304 Total 2604

## The Team events

The new team competition took place the 28th March, the fifth and last day of the championships. For a first attempt, it was a master stroke. It was captivating. The rule enlarged the sense of the phrase "Team" archery. The rankings are no longer based on the sole total of the three best scores obtained by the three members of the same team during the individual event. From now on, the three members of each team find themselves side by side to shoot on the same target. Each "10" belongs to all, and each error becomes everyone's error. The tension is extreme. Each one feels the need to help out the others, but also to be supported, in order to compete at the height of one's own abilities. A 30 Km/h wind increased the difficulty which the competitors had to surmount.

The Soviet women archers confirmed their supremacy by obtaining a 6th title after those of 1969, 1973, 1975, 1981 and 1985.

The Germans from the Federal Republic won the supreme title for the first time.

## Acknowledgements

The journalists present voiced their interest in the Championship's new formula.

On the whole, the articles taken from the international press, praised and were positive especially concerning the formula of the team event. According to them, the Grand FITA Round allows them to make the events more understandable for the public and to maintain the interest of their readers. Thus, archery has proved that it held the attention of the spectators while increasing the pleasure of the archers.

Thanks go to all those who took part in this adventure, the participants first of all, for the show they put on, but mostly to the organizers whose hospitality and generosity were appreciated by all.

(edited from the notes sent by our Canadian friend Nancy Littke and by Norm Smith, Secretary General of the

### **Target World Championships in Lausanne in 1989**

In 1989 Lausanne, Olympic city, world sports city, will be the capital of archery, Olympic discipline since the turn of the century.

Indeed, after having hosted fencing in 87 and curling in 88, Lausanne will host the Target World Championships from the 4th to 8th July 1989.

The men's and women's events will take place on the football fields of the Chavannes sports complex. All the facilities such as the competition, training and warm up sites, as well as the offices reserved for administrative purposes for the press and for the athletes will be grouped together in one single place.

These Championships will take place in conjunction with the Congress of the «Fédération Internationale de Tir à l'Arc», the FITA, which groups together 70 associations throughout the whole world.

The FITA having designated Switzerland as the organizing country of the 1989 World Championships, the Swiss Archery Association, ASTA, in its 26 April 1986 meeting elected, by majority, the city of Lausanne. Let us note that the last time these Championships took place in Switzerland was in 1975, in Interlaken.

The Lausanne 89 Organizing Committee is made up of representatives from the ASTA, from the two clubs from Lausanne: the «Compagnie des Archers de Lausanne» and the Archery Club of Monthèron, from the city of Lausanne and from the Tourism and Congress Office.

The organizers expect some 300 archers and more than 200 participants at the Congress. They will be able to total 5,000, of which 1,000 are registered members belonging to the 50 clubs affiliated to the ASTA.

the World Championships take place every two years and took place this year in Adelaide, Australia.

A Swiss official delegation headed by Mr Rudolf Dubach, ASTA President, and Mr Teddy Bettex, president of the «Compagnie des Archers de Lausanne» and of the Lausanne 89 Organizing Committee, went to Adelaide. These representatives dedicated themselves to studying the organization and they especially devoted themselves to the promotion of the Lausanne Championships in order to make the archers of the world more aware of the coming Lausanne competitions in 1989.

*In Kampala, Stan Patterson with a group of participants.*

## Development and technical assistance

### A Work about DTAC by Don S. Rabska

The FITA Development and Technical Assistance Committee (DTAC) was created in October 1985 as an active committee to promote archery worldwide. The initial intent of this program is to stimulate the growth of archery in many countries that do not already have established programs, but show interest in creating an archery association.

Through the foresight of people like Francesco Gnecci-Ruscione, FITA President, and DTAC Chairman, Jim Easton, this project in close cooperation with Olympic Solidarity program will have a far reaching impact in further strengthening the position of archery as an Olympic sport.

Presently, seventy-two member associations are affiliated within the international body of FITA. However, the ultimate goal of the DTAC program is to increase the number of member associations to a level consistent with IOC (International Olympic Committee) affiliate countries of approximately 145 nations.

A committee like DTAC has long been needed to take an active roll in promoting archery as an international sport, and to encourage new member associations to join FITA.

The response was overwhelming, with several manufacturers donating much more than was requested of them. Once enough equipment was received to conduct the first DTAC mission, Raoul Theeuws of Belgium produced custom shipping crates that would allow for the safe transport of the equipment and provide an organized portable archery shop once on site. With the ground work finished and all equipment ready for shipment, the first mission was underway.

The country of Uganda had been chosen from a list of applicants to receive DTAC assistance. In order to make the mission more effective, several neighboring countries were also invited to participate.

Each mission team consists of two experts, one as the organizational and administrative specialist, and the other as a coaching and instruction expert.

The mission took place in early January of this year. This event was certainly a milestone in the fifty-six year old federation, and this was the first time that FITA has actively solicited FITA membership by providing expert personnel, technical and financial support.

### First FITA Development and Technical Assistance Mission In Kampala, 7-20 January 1987

The first mission for technical development and assistance initiated and brought about by the FITA with the help of Olympic Solidarity took place in Uganda at the beginning of the year from 8th to 20th January 1987. The results appear very positive. However, initially things were not made easy by the late arrival (24 hours, because of the cancellation of their planned flight) of the two FITA experts in charge of the course, Stan Patterson from Great Britain and Raoul Theeuws from Belgium. This mishap was soon overcome with the efficient help awaiting them from their hosts of the Ugandan Federation of Amateur Archery, the most recent of our National Fede-

rations. Accompanied by Mr. Onegi-p'Minga and Mr. A. Kiseka, they visited installations planned at the Lugogo sports centre, met the President of the Uganda National Olympic Committee, Major-General F. Nyangweso, and the Secretary General of the Sport's Council and took part in a meeting for co-ordination.

On the morning of January 12th, everything was ready to receive the participants. The courses began alternating the teaching of theory with that of practice. On the programme of the conference appeared the History of Archery, the basic technique of Target Archery, aspects of administration, training and direction of a club and an association, programmes for schools and universities, judging, financing, sponsoring etc. The practical courses were given in perfectly secure conditions on a closed cricket pitch appropriately fitted up. Competitions brought the course to an end. The students took part with enthusiasm.

On January 20th the mission came to an end with a demonstration of archery given before numerous personalities from the world of sport and politics. Everyone seemed impressed with the quality of sportive archery. During the closing ceremony the Ugandan organizers thanked FITA for this course which should soon permit the apparition of Central African archers on the shooting line of International Competitions.

DTAC projects and others like it will have as much or more impact on the future growth of archery as its reintroduction as an Olympic event in 1972.

Not only will DTAC programs introduce archery to countries which do not already enjoy the sport of archery as we understand it, but will also assist existing associations in developing higher levels of coach and training programs and better prepare current programs for future growth. As FITA continues to grow in international stature, the worldwide promotion of archery through programs like DTAC will greatly aid in strengthening FITA's position within the Olympic movement while maintaining archery as a viable Olympic event.

Putting together the DTAC program was much like setting up a new business, or forming an entirely new organization. In order for this program to function properly, it was necessary to produce a model constitution and by-laws, draft formal budgets, prepare a coach and administrative manual, compile lists of international experts per specific talents and language ability, and much more.

The next phase of the operation was to obtain enough actual equipment to prepare instructional archery sets for a minimum of thirty students.

*Raoul Theeuws with the kit especially designed for the mission*

### **Nominated to the medical committee**

Jean Dupouy, medical adviser to the French Archery Federation, possessing degrees in medicine and biology and an expert in sports medicine, is now on the FITA medical committee. The executive committee appointed him on the proposal made by Dr. Godfrey Wooton, the president of the medical committee.

The DTAC Chairman requested equipment donations from archery manufacturers around the world.

FITA's sincerest appreciation goes to the members of the Development and Technical Assistance Committee for their diligence, hard work, and dedication to the sport. These members are Jim Easton, Chairman, Raoul Theeuws and Nikola Skoric. Stan Patterson, although not an official member of DTAC, also contributed greatly to the success of the program.

Stan and Raoul were the two experts chosen to conduct the Uganda mission. Through their efforts, the country of Uganda has recently applied for FITA membership; a job well done.

Due to the success of the first mission, two additional countries will receive DTAC assistance for 1987. The first of the 1987 operations will take place in cooperation with the Olympic Solidarity in the Solomon Isles. The second one will be near Rijeka in Yugoslavia; this regional triennial course will be organized from September 1987. Some member federations have been invited to participate (BUL, GRE, HUN, ROM, TCH, TUR) but also some Albanian representatives from whom we should like to gain the affiliation of the National Federation.

28th September-1st October *International Tournament* in Spala Tomaszow Mazow (POL)

(I) Competition open to authorized members of all the Federations affiliated to FITA

## Field Archery: Revision of the rules and 1988 World Championships

On 24th and 25th May 1987, the seven members of the ad hoc committee got together in San Genesio/Bolzano (ITA) for the revision of the Field Archery rules. A first project for the rules has been put together. The members will continue their task during the coming months. This meeting coincided with the XIth Trofeo del Gufo (Owl Trophy). The teams from 12 countries took part. This competition took the form of the last rehearsal before the XIth World Championships planned for next year on 29th May to 6th June.
